Assignment - 1

A)

Executive Summary

The requirement of medicine in pharmacy stores. In many medical shops there is not available a medical specific medicine which we have because of that in emergency our time are waste. we don't get a medicine in that time. for this problem we can create a digital web-site to for medical stores.

B) Project description:-

The medicine availability and nearby medical stores app is designed to help users find nearby pharmacies to check the availability of specific medicines.

C) Project Scope :-

In the medicine app we can design for understanding the people who can be bought the medicine easily. It is good for scope of medicine app because the persons need specific medicine who can easily search in this app and find available medicine in nearby Pharmacy. In emergency the app is going to be good for people.
